Summary of the sprint retrospectives of Team41

Sprint1:
1. In the first sprint everyone was struggling with understanding what needs to be done
2. At that time we met our team.
3. We created the first Mockup of the future project.
4. We found out that the login page is not required by the client so it was not our main priority anymore

Sprint2:
1. Here we created the first version of the Frontend
2. We started developing the parser
3. We created the database
4. Showing a table with all the uploaded files

Sprint3:
1. Adding testing classes
2. Improving parsing the mt940 file
3. We created the second version of the frontend
4. Giving information about the risk of giving a loan
5. We merged the frontend with the backend.
6. At this point we were working quite well as a team

Sprint4:
1. Adding login page with all its functionality
2. Improving the security of our webapp, hashing the password of the user
3. Making all the needed reports.
